Abstract (en)

[origin: WO9412264A1] In a method for cleaning filter bags (9) in a bag-filter installation (1), in which the filter bags (9) are arranged in a plurality of rows and the dust content of the filtered gas is monitored by means of a monitoring unit (8), cleaning is carried out by blowing a pressure medium into the filter bags. The pressure medium is blown into the filter bags (9) row by row, the filter bags (9) in one and the same row being cleaned simultaneously, and the rows being successively cleaned at a time interval exceeding the time it takes for conveying the filtered gas from the cleaned row to the monitoring unit (8).
