Abstract (en)
The snowshoe has a fastening system comprising a plate carrying front (9) and rear (10) fasteners. The rear fastener comprises a movable piece connected to the plate by a tensioning belt (13), which slides on the plate so that its tensioning and locking causes movement towards the front. The front fastener is formed in part by fixed elements (19,21,21a,21b,65,66) attached to the front end of the plate and in part by a movable cover (25). The cover pivots about an axis (X,X') on two lateral arms (19,20) fixed to the plate front end. The cover has two lateral pivoting arms (26,27) connected by a fastening wall (28), each having a passage hole (31) for receiving a front belt (33). The tensioning belt median part (135) is engaged around an anchoring part (47) fixed to the plate. The lateral portions (130a,130b) are engaged in a loop (44) on the rear movable piece.

Abstract (fr)
Raquette à neige (1) comprenant un dispositif de retenue (7) de la chaussure (6) du type comprenant une plaque (8) portant des moyens de retenue avant (9) et des moyens de retenue arrière (10) caractérisée en ce que lesdits moyens de retenue arrière (10) sont disposés coulissants sur ladite plaque (8) et sont reliés à la plaque (8) par des moyens de traction (13) de façon à ce que la tension et le verrouillage desdits moyens de retenue arrière (10) provoquent le déplacement vers l'avant de ceux-ci. <IMAGE>
