Abstract (en)
[origin: EP0671344A1] The method involves the use of a container with a flap fixed to a lever mechanism which. The container (5) is filled so that the path to open the container is released. The flap (7) is opened by the material on it. The container is emptied by means of gravity. The flap is closed by means of a counter-weight fixed to the lever mechanism. The flap is attached to one end of the lever mechanism (2). At least one drive element (9) is attached to one end of the shaft (8) on which the lever mechanism is mounted. The shaft is connected to the drive pneumatic, electric or hydraulic element.
