Abstract (en)

[origin: EP0671518A2] The system consists of wooden boards (1) placed near to each other, and butting against end posts (2). The posts connect with the boards by tongue and groove profiles (R). There are additional tongue (11) and groove (10) profiles (N) on the opposite faces of the posts to the boards which are asymmetric about their centreline. Additional retainers (8), driven into the boards through the end faces of the posts, using screws, pins, or nails, can also be provided. Corner posts with the tongue and groove profiling on two adjacent faces may be congruent with that of the frame.
