Abstract (en)

[origin: WO9325658A1] Cell culture or metabolite production device comprising means for supplying fresh nutritional liquid to a culture chamber. Said means consist, for example, of a stack (18) of annular elements such as disks (20) forming a nutritional liquid circulation tube, the surfaces of said disks constituting with one another micropassages for supplying nutritional liquid to a cellular culture chamber delimited between two microporous membranes (16).
