Abstract (en)  
A necktie consisting of a supporting collar (2) to be fitted round the collar of a garment, and a first portion (3) and a second portion (4) placed in view over the garment with which the necktie (1) is worn and which is modular in that the first and second portions (3, 4) are separate components joined together by a coupling (5) placed between them and made in such a way as to constitute an interchangeable connecting element for the said first portion (3) and the second portion (4); the coupling (5) may be made by different processes and in different shapes and allows the tie (1) to be changed completely in appearance by simply changing one of the two portions (3 or 4). <IMAGE>
