Abstract (en)  
[origin: EP0672876A1] A cooling device including vacuum insulated walls enclosing a cooling space, is designed to enable arrangement of functional elements in the cooling space formed by the smooth internal wall-surfaces in a simple manner. The box includes at least one independent support or carrying element (12) mounted on at least one horizontal section (10) of an inner wall (6). The support element is designed as a closed surface element with moulded retention elements (13) for refrigerated goods trays or similar.
