Abstract (en)
[origin: EP0673095A1] The electrical switch includes a housing provided with at least one stationary or fixed contact-part and an assigned switching contact part and on which is movably mounted at least one actuating member for controlling the switching positions of the switching contact part. To allow easy and convenient removal, without preliminary dismantling and without resorting to use of tools, of a particular switch component or module, at least one actuating member of the electrical switch is joined to the retainer device via a transmission device and is located under increased force output into a functional position not corresp. to the switching positions and in which the retaining device is in its releasing setting.
