Abstract (en)

[origin: WO9413770A1] Water-soluble surfactant mixtures contain (a) anionic surfactants selected among mixtures of salts of monounsaturated and/or polyunsaturated fatty alcohol sulphates and saturated fatty alcohol sulphates and (b) selected non-ionic surfactants. These surfactant mixtures and the liquid washing products containing the same have an improved cold stability in comparison with surfactant mixtures or liquid washing product which contain only saturated fatty alcohol sulphates as anionic surfactant fatty alcohol sulphates.
