Abstract (en)  
[origin: WO9510802A1] The invention relates to a transparent analog clock or watch (10) with a minute hand (21) and hour hand (16) driven centrally via hollow spindles in front of a dial (11), with an adjustable hand drive behind the dial (11), with a transparent disc (13) as the watch or clock glass, a transparent disc (14) as the back and with a case ring (12). The features of the novel transparent analog clock or watch are that the dial (11) is also transparent, the hollow spindle of each hand is driven via a transparent, disc-like pinion (22, 27) and that its drive (23, 24; 28, 29) is fitted invisibly in the case ring (12).
