Abstract (en)
The wire drawing drums (1) are disposed at a short distance from each other and the wire passing from one drawing drum to the next is run around a skew pulley (8) of suitable diameter, disposed above each drawing drum and designed to act also as an idler or tensioning device for the longitudinal tensioning of the wire. A drawplate (107) is provided between each skew pulley (8) and the underlying drawing drum. <IMAGE>
