Abstract (en)  
[origin: EP0673718A1] The centrally mounted distributor wheel (100) is fixed on a shaft stud (1) of a drive shaft by a central screw (8). The shaft stud (1) is enclosed by a rim (30) comprising a side disc (5) and hub (16) and having several bores (17). The sleeve (3) of the distributor wheel is secured against turning opposite the shaft stud by several security pins or screws (15) arranged over the stud and let into the bores (17) in the rim. The rim can be a one piece element. The bores inside the rim are blind holes which are inaccessible and invisible from outside.
