Abstract (en)

The calibration device (82) is for washing units which each have a support (46) for fixing them to the side frames (42) of a printer by fastenings (40). It has at least one pressure element (32) pressing the wash-towel (20) elastically against the rotary body (14). The pressure element is held by a holder (50) adjustable in relation to the support. The calibrator has a first reference point in the form of a stop wall (86) and a second reference point in the form of positioning elements (40/2). Each wash unit has at least one pressurised air compartment.
