Abstract (en)  
[origin: US5673630A] A pallet (1) is made of steel or plastic, with a sublime (2), corner feet (7) and center feet (15, 16), a base pan (8) made of sheet metal, resting on feet (7, 15, 16), with a drainage bottom (9), which has a drainage channel (10). Base pan (8) holds, with positive fit, an internal container (11) made of plastic with an outer jacket (12) made of sheet metal or lattice work and a drainage bottom (13), or forms part of a sheet metal container. A stiffening sheet (14), made like a girder, is fastened under the base pan (8), crosswise to its drainage channel (10). Further to provide greater transport security and simplification of construction, two center feet (15, 16) are integrally molded on both ends (14a, 14b) of the stiffening sheet (14) that is made like a bridge.
