Abstract (en)

[origin: EP0674071A1] The gear comprises hollow profiles, with a housing (22), in which a pinion (23) provided with a multi-edged recess (28) is rotatably located for the operation of a drive rod. Next to the pinion is at least one tapped hole (29) for a fixture screw. The tapped hole is formed in a displacement part (30'), which is displaceable in the housing axially and in its engagement position does not extend over the one side surface (35) of the housing and in its disengaged position extends over this side surface to engage in a hole in the hollow profile of the pane frame.
