Abstract (en)
The rotary fixture is for a pane or panel of a window or door and has a rotary bearing (1) connected with a frame, which via a connecting arm (7) pivotable around the rotary axis of the pane or panel is connected at least at two points with a fixture part (14) fixed to the pane or panel. The connecting arm is releasably connected with the fixture part fixed to the pane or panel, whereby the one of the releasable connections, pref. a connection in the area of the side of the pane or panel facing the rotary bearing, is formed as a securing connection. The connecting arm has a securing accommodation (11) and to the pane or panel a securing bolt (17) or similar is fitted in the securing accommodation and is displaceable in the release position against the force of a spring (22).

Abstract (de)
Die Erfindung betrifft einen Drehbeschlag für einen Flügel eines Fensters, einer Tür od. dgl. Zur einfachen Montage des Flügels mit dem zugeordneten Rahmen wird erfindungsgemäß der Drehbeschlag so ausgestaltet, daß der Verbindungsarm (7) lösbar mit dem am Flügel befestigten Beschlagteil (14) verbunden ist, wobei eine im Bereich der dem Drehlager (1) zugewandten Seite des Flügels vorgesehene Verbindung als Rastverbindung ausgebildet ist. <IMAGE> <IMAGE>
