Abstract (en)
[origin: EP0674081A2] The frame has a cpd. profile of wood and plastic, in which the plastic profile is connected with the wooden profiles forming the frame and panel by means of formed ribs, which are inserted in grooves of the wooden profile. A cold zone back ventilation (L) is provided between supporting wooden profiles (1.3) and sheathing (2,4) of plastic, whereby the sheathing support with partially slotted distance ribs (2b,4b) on the wooden profiles so that a drainage hollow space remains between both profiles. The inner profile of the sheathing and the inner profile of the wooden profiles have the same shape.
