Abstract (en)

[origin: EP0674357A1] The outer female casing has a front opening section (16) and a lower narrower channel (17) forming a T-shaped section. There is a wedge shaped flap above the wide section of the channel. The male connector casing (2) fits into the channel with a flap (8) butting up against the wedge on the female section. The inner female contact section has a hole for a spring contact in the male section and a second spring contact is pushed aside.
