Abstract (en)  
The hearing aid is supplied by a rechargeable, or non-rechargeable, battery, with the automatic cut-out device disconnecting the battery supply a short time after the hearing air is removed by the user. The automatic cut-out device may respond to an acoustic tone provided by the user falling below a given threshold level for a time duration, to disconnect the battery supply, or when the heat, moisture and/or pressure obtained from the body of the wearer drops below a given level.

Abstract (de)  
Die Erfindung betrifft ein Elektrisches Hörgerät für eine schwerhörige Person, wobei eine Einrichtung im Hörgerät angeordnet ist, die die Stromversorgung des Hörgerätes selbsttätig abschaltet, wenn das Hörgerät von der Person abgenommen wird.
