Abstract (en)

[origin: EP0674855A2] The waterproof and vapour-permeable layer (27) is loosely contained in the piece of clothing in relation to the top material (23). The tunnel for the cord (15) is positioned between the top material and the functional layer (27) and has an opening (33) into the functional layer. The cord tunnel passes along the inside of the functional layer and has at least one tunnel opening (29) on the inside of the functional layer. At least one strip (35) is welded onto the outside of the functional layer facing the top material and or the inside of the functional layer facing the wearer of the clothing, above the hole (33) in the functional layer, to seal it.
