Abstract (en)

The play set consists of a series of blocks (31-39) in various shapes which can be laid out in different configurations for children to play on. Two of the blocks are, for instance, in the shape of rectangular and cylindrical beams (35, 36), while others (31-33) are used to support the beams. The supporting blocks (31-33) have vertical or horizontal projections and flat or rounded surfaces corresponding to those on the beams to hole the beams securely while children are walking on them. Other blocks (37, 38, 39) can act as a ramp or maps. The blocks are made, for example, from polyurethane foam enclosed in a fabric, or from low-density polyethylene, which can be rotomoulded. <IMAGE>

Abstract (fr)

Dispositif d'encastrement à fonctions multiples pour modules d'éducation motrice, du type comportant un berceau à ouverture arrondie 2 susceptible de recevoir un module cylindrique. Deux bras 3, 4 parallèles, s'étendant parallèlement à l'axe géométrique de l'ouverture arrondie 2 et délimitant entre deux un espace susceptible de recevoir un module à section carrée. <IMAGE>
