Abstract (en)

[origin: EP0675230A1] The grille (1) comprises at least two lengthwise members (18) by means of a locking element (10) which is able to slide between bars of the grille and engage with a recess (13) in the lengthwise member. The locking element is made from an elastically deformable natural or synthetic material in the form of a shoe sliding between two adjacent bars of the grille and equipped with a hook to engage with the recess. Each lengthwise member of the grille frame has at least one lug (17) which is able to engage with a notch (18) in the grille for accurate positioning, and a seating surface to receive the grille. <IMAGE>
