Abstract (en)  
[origin: EP0675469A1] The security system has a portable, battery-operated, alarm centre (1), with a receiver (4) for reception of signals from the intruder detectors (5) installed in the building and a transmitter (6) for transmitting radio signals for activating the alarm sources (7). These have acoustic and optical signalling of the received radio signals and a manual cancellation device for the received signal. Pref. the portable alarm centre has a manual button for cancellation of the alarm sources and a time delay preventing the alarm cancellation by accidental operation of this button.
