Abstract (en)
[origin: WO9414962A1] The present invention discloses methods for the production of Varicella-Zoster virus immediate early protein 175 (IEP 175) and derivatives thereof by recombinant technology - DNA and amino acid sequences are provided for IEP 175, structural or functional homologues, as well as fusion proteins and vectors adapted for eukaryotic host cells. Said protein and derivatives thereof are used as vaccines against VZV.
