Abstract (en)

[origin: EP0676333A1] The packaging for medical prods., such as contact lenses and esp. disposable contact lenses, is a plastics bottle (1) as each holder forming as assembly of separate holders for the lenses. Also claimed is a mfg. process where an extruded tube or two sections of the tube are placed in a blow mould for each holder (1), to give a bottle body (1') with a shaped neck (3). The protective fluid and the lens, or other prod. are inserted into the bottle body (1') while still in the mould. The closure (7) is shaped at the neck (3) so that the holder (1) is tightly sealed. <IMAGE>
