Abstract (en)
[origin: EP0676585A1] The light fitting includes a metal profile (7) forming the base within which the electrical wiring (6,10-15) is fitted in order to supply the fluorescent lamp tube. connectors (4,5) are provided at each end of the support to carry the fluorescent tube fitting. Several holes (3,9) are made in the base of the metal profile to allow the supply cable to be brought into the fitting. At least two mountings are provided for the cable connector (16,17) which can be put in either position. The internal wiring of the fitting is sufficiently long that the connector can be used in either position, according to the chosen point of entry for the supply cable. <IMAGE>
