Abstract (en)

[origin: WO9512436A1] The racquet with a tension frame (1) for the strings, a handle and, at least partially encompassing the tension frame (1), an outer shell (2, 3) made of a resistant elastic with a smooth outer surface, where the outer edges of the outer shell (2, 3) run parallel to or in the plane of the strings and the outer shell (2, 3) is grooved circumferentially or is composed of several shell sections whose mutually facing edges delimit circumferential grooves, is characterized in that the outer shell (2, 3) is bonded with the tension frame (1) and has a film with decoration applied by thermoprinting or reverse printing.
