Abstract (en)

[origin: EP0677376A1] The apparatus may be installed in the proximity of a hydraulic press having a bale pressing chamber (1) provided with an outlet port (3) for pressed bales (20) and may be associated with an automatic pressed bale binding appliance. It has a tubular auxiliary chamber (10) formed by a fixed first tubular box (11), and a moving second tubular box (12) which may slide along the outer surface of the first box (11). There are guide members (13, 14, 14a) and drive means (15) for the sliding of the second box (12). The tubular auxiliary chamber (10) is provided with open opposite end ports (17) and one of them is facing the outlet port (3). Between them there is a moving gate (3a). <IMAGE>
