Abstract (en)

The bag comprises a central body (1) for carrying the products to be contained (2) and bears, at a definite spacing from the bag body, a longitudinally disposed narrow strip (3) of resistant, synthetic material, welded at its ends (4, 5) to the ends of the net bag, along the welded areas for fastening the bag, facilitating the means for fastening the bag owing to its provision as a longitudinal handle. Individual small pieces of plastics material strip (8, 9) having the same characteristics as the strip (3) constituting the handle, are arranged at both ends of the bag, opposite the ends of the strip acting as the handle, and connected thereto and to the bag by the same weld (6, 7). <IMAGE>
