Abstract (en)

[origin: EP0677610A2] To fold garments, and especially aprons or trousers and the like, at least one lateral folding station is in front of the longitudinal folding action. The lateral folding is applied at least while the garment is being advanced through the folding process. Also claimed is an appts. with at least one lateral folding station (18, 19) in front of the longitudinal folder (20). The lateral folding stations (18, 19) are formed by conveyor belts, so that the garment is advanced with a lateral fold to the longitudinal folding station (20). <IMAGE>
