Abstract (en)

[origin: EP0677634A1] The pin-mounted hook bolt (24) has an angled slot (30) on a level with the mouth (31) of the hook and into which fits a drive pin (29) of a transmission pivot lever (25) which has a three-part control slot (33) for the control pin (32) of an operating slide piece (11). The transmission pivot lever with a slot (27) is guided on an upright pin (8) of the lock-housing (2). The upright pin is roughly the same part (36) of the three-part control slot, containing the control pin in a closed end position, extends beneath the hook bolt's pivot point (28) on the same level.
