Abstract (en)

[origin: EP0677860A2] Control thermostat (1) has an elastic and conductive blade (21), fixed at one end (23) and free at the other end (22). The electrical connection (24) for the warning lamp (38) is connected to the fixed end (23). The free end of the blade (21) can be in either of two positions. In one setting, the free end (22) is in contact with a flexible tongue (11) through pressure (25) when the temp. is at a level to light the warning lamp (38) to show that the temp. is too hot, and out of contact with the tongue (11) when the temp. is lower than the danger level. <IMAGE>
