Abstract (en)
[origin: EP0678275A1] The dosing device (1) has a supply container for holding the rinsing additive for the rinsing water in the form of tablets, which are separated to allow them to be added to the rinsing water under control of the programme cycle. Pref the dosing device is attached to the crockery basket within the rinsing drum, or is attached to the wall of the latter, with cooperating parts of the dosing control provided inside and outside the rinsing drum coupled together via an inductive or mechanical coupling. <IMAGE>
