Abstract (en)

[origin: EP0678382A1] There are pivoting holders (50,51) installed next to the printing forme cylinder (1) of a bottom printer of a printer unit. They are used for placing part of the printing forme (B) leading to the printing forme cylinder against the outer surface of the printing forme cylinder. The holders are positioned on a plane (50) swivelling on the pivot axle (52) parallel to the printing forme cylinders rotational axis. The swivelling plane is moved by an adjustment (54). <IMAGE>
