Abstract (en)
[origin: EP0678630A2] The single point fitting is for fitment on a connecting component (7) in or on a building wall, and has a cover rosette (8) and at least one mixing unit (11), operable by at least one operating component (1). An inner body (3), which has channels (29) for cold and hot water, has a covering (2) and at least on the downstream side is equipped with a rapid coupling. The fitting has fixture members for connecting with the connecting component. The fixture members are formed as a cap nut (4) with axial clearance and a spring ring (5) with securing ring (6). They have a dia. which is greater than the fitting covering. <IMAGE>
