Abstract (en)

[origin: WO9416047A1] The present invention relates to a detergent composition containing from 1 % to 80 % by weight of a detergent builder compound; from 0.005 % to 2.5 % by weight of a paraffin oil; an oxygen-releasing bleaching agent such that the level of available oxygen in the composition measured according to the method herein is from 0.3 % to 2.5 % wherein the rate of release of said available oxygen is such that the available oxygen is completely released from the composition in a time interval of from 3.5 minutes to 10.0 minutes, using the test protocol described in the present description.
