Abstract (en)

The waving equipment consists of short spring loaded jaws (2) (3) which are rectangular tile shaped and overlap along longitudinal edges (6). The jaws rotate about an axis (4) and are handled by a prolongation (5) of one of the jaws. The jaws are not heated integrally but use an external heating unit (8). The heating unit consists of a box (9) equipped with heating resistances (12) and thermostat (13) and also fitted with tile shaped blades (14) which are suitable to receive the waving jaws (2) (3) and heat them by conduction.

Abstract (fr)

La présente invention a pour objet un dispositif permettant l'ondulation des cheveux. Ledit dispositif permet l'ondulation des cheveux par décollement de la racine muni d'un dispositif chauffant externe destiné à coopérer avec des pinces (1) de faible longueur et se caractérise essentiellement en ce que les mâchoires (2, 3) de ladite pince (1) ont une forme rectangulaire tuilée selon un axe (AA'), disposées de manière à venir en contact l'une de l'autre par un seul de leurs bords longilignes 6. <IMAGE>
