Abstract (en)

[origin: EP0679561A1] Angled levers (26,27) are articulated connected via their first arms to the wheel-set bearing housings (4,5) of the central wheel-set (9). Each steering bar (12,13) is similarly connected to the second arm of an angled lever. The levers pivot approx. frame-fixed pivot axis (28). The connection between steering bars and angle levers is via steering rods (22,23). The wheel-set bearing housing of the central wheel-set has additional longitudinal guidance via longitudinal swing arms (30,31). <IMAGE>
