Abstract (en)
[origin: EP0679741A1] Sliver (F) is supplied from a number of sources to a drafting system (5, 6) over a guiding arrangement (14) which turns the sliver into a direction (T) perpendicular to the axes of the drafting system inlet rollers. Several guides (16a-16f) are arranged across the width (B1) of the drafting system (5, 6) to guide each sliver (F) individually from an upward into a horizontal feed direction (T). <IMAGE>
