Abstract (en)

A weft yarn cutting device presenting a first (10) and second blade (11) moving in relation to each other in a cutting plane perpendicular to the fabric (3) and inclined in relation to the feed direction of the fabric; first positive control means (30) for the first blade; and second positive control means (31) for the second blade; the second control means generating a movement independent of that generated by the first control means; and the second blade being connected mechanically to the first. <IMAGE>
