Abstract (en)
The casing box (1) has a main frame (3) that supports the window pane (4), which fits into a carrier insertable in the roof. The main frame carrier is a frame-type installation surround (2) of heat-insulating material, which has a greater depth than the main frame. The installation surround is insertable in the specific roof opening, at least partly overlapping the area of the roof insulation, and accommodates the main frame, covering its outer surfaces completely. The installation surround comprises four pre-prepared parts and is screwed to the main-frame. It is made of polyurethane recyclable material. It has a sandwich structure, whereby a support part (7) is of a material of higher strength and an insulating part (8) with higher heat insulation is arranged on the part of the surround which after installation lies outside the roof insulation. <IMAGE>

Abstract (de)
Die Erfindung betrifft einen Futterkasten (1) für ein Wohndachfenster mit einem Blendrahmen (3) für die Aufnahme des Fensterflügels (4) und in das Dach einsetzbarem Blendrahmenträger. Für einen einfacheren Einbau des Futterkastens in das Dach mit gleichzeitiger hoher Dichtigkeit und guter Wärmedämmung wird vorgeschlagen, den Blendrahmenträger so auszugestalten, daß er aus einer rahmenartigen Einbauzarge (2) mit wärmedämmenden Isoliermaterialien besteht. <IMAGE>
