Abstract (en)
[origin: WO9417153A1] A non-azeotropic refrigerant composition comprising (A) a first component which is a low boiling refrigerant comprising at least one compound selected from the group consisting of the (hydro)fluorocarbons, (hydro)fluorocarbon ethers, hydrocarbons and CO₂ and (B) a second component which is a high boiling refrigerant comprising at least one compound selected from the group consisting of the (hydro)fluorocarbons and (hydro)fluorocarbon ethers, the first component (A) and the second component (B) having boiling points which are separated by at least 20 DEG C.
