Abstract (en)
[origin: EP0680790A2] A nozzle for increasing the uniformity of distribution of a powder including a first passageway (12) through which a bearing fluid stream with the powder entrained in it is emitted and a pair of second passageways (18) for directing a fluid compatible with the bearing fluid stream with the powder entrained in it onto opposite surfaces of the bearing fluid stream with the powder entrained in it. <IMAGE>
