Abstract (en)

[origin: WO9515475A1] A propellant charge container securable to a second container via one of its front surfaces, and comprising a ring (12) slidably arranged in a first necked portion whereby it can partially cover a second necked portion on the second container. Said ring (12) has an internal thread (16) provided on a front end (15) and engageable with a thread (18) on the second container. Said container is useful for producing ammunition.
