Abstract (en)
[origin: EP0681965A1] The goods carrier has a flat base surface (5) of the size of a standard pallet (2), around which are arranged vertically directed side surfaces (3,4). The side surfaces formed as one-piece with the base surface engage directly and telescopically in one another, whereby at least one of the side surfaces of the goods carrier is directed downwards. Corner guides are provided which engage in a goods carrier following in a vertical direction. The side surfaces have view windows. <IMAGE>
