Abstract (en)

[origin: EP0681972A1] The device consists of at least one container accommodated in a holder. The container (2) has lateral supports (3) with which it locates on two extending supports (22) of the holder device (1). The locating surfaces (14) of the container, in order to achieve an inclined position, are formed inclinedly to the upper edge of the container. The holder has a stop formed pref. as a cross bar (4) or projections between the supports. <IMAGE>
