Abstract (en)

[origin: EP0682135A1] Device for turning a mattress (4) on a working table of a hemming machine (7), comprising a vertically hinged structure (14) supported by a fixed frame (1,12) above the working table and rotatable about a vertical axis (C) that passes at the stitching region of the hemming machine; a pusher (31,32) guided vertically on the vertically hinged structure; means (33,34) for moving the pusher between a raised disengagement position and a lowered one, at which the pusher laterally engages the mattress; and means (20-23) for rotating the vertically hinged structure between two positions angularly offset by 90<o>. <IMAGE>
