Abstract (en)

The switch includes a manual control button (13) which has an automatic control position in the centre of its window (12) for passage of the control button (13), with the teeth (63) of a rack on the underside of a button in meshing engagement with the toothed sector (62) of a rocking element on an axis (61) parallel to that (46) of a lightweight right-angled lever (40). In the alternative position a finger (65) on the rocking element engages the end of one arm (41) of the lever, whose other arm (42) lifts the carrier (21) of the moving contacts (18) into engagement with the fixed contacts (17), without energisation of the coil (31). <IMAGE>

Abstract (fr)

Un levier 40 articulé sur un palier fixe 46 présente un bras 41 mené par un bouton de commande manuelle 13 et un bras 42 maintenant l'alignement du circuit magnétique mobile 34 via un palier 43. Une pièce basculante 60 d'entraînement et de blocage est disposée entre le bouton 13 et le bras 41 du levier. <IMAGE>
