Abstract (en)
[origin: WO9418505A1] The fixing system for sectional heating elements consists of a plurality of fixing members connected to a heating element in order to support the heating element on support members which are anchored in a wall or a floor. Parts of the fixing members are pre-mounted at the factory as clamping elements (2) located at their correct positions between heating element sections (1). The clamping elements (2) are provided with sidepieces (4) which partly wrap round the heating elements (1) and have a recess (5) between them.
