Abstract (en)
[origin: EP0682891A2] This invention consists of an arrangement for extendable tables in which the sides have runners (4, 5) and with at least one of the planes being moveable, with the upper plane (2) which is moveable to one side, having two pairs of rollers (7,8) located at the centre and end of this to function as a stop, and a lower plane (3) with rollers (9) located at 1/7 from its ends, the lower plane of which can be manually raised after movement of both up to the upper plane by the channel (12) with there being an extra support for the upper plane provided by a fixed roller (6), with stops fitted at the end of the lower runner (10) on the lower runner (13) lined up with a communication channel between both runners. <IMAGE>
